SUMMARY

Software Engineering undergraduate from the Informatics Institute of Technology (IIT), affiliated with the University of Westminster with hands-on experience in full-stack development, React, Node.js, Python, and Java. Interested in building scalable mobile and web applications and modern software solutions. Seeking a Software Engineering and Project Management Internship to contribute to real-world projects and grow as a software engineer.

PROJECTS

HomeMeals (2026)

github.com/kavithz/HomeMeals

- Developed a full-stack web application for discovering, saving, and managing meal recipes using React, Node.js, Express.js, SQLite, and TheMealDB API.
- Implemented meal search, detailed recipe viewing, favorite meal saving, and custom recipe management with complete CRUD functionality.
- Integrated TheMealDB API to populate recipes, enhancing content diversity and user engagement with a broader selection of meal options.

Recruitment Management System (2026)

github.com/kavithz/Recruitment-Management-System

- Developed a web application for managing candidates throughout the recruitment lifecycle using React, Node.js, Express.js, and PostgreSQL.
- Implemented candidate tracking and management features to streamline the hiring process.
- Designed and implemented a RESTful API using Node.js and Express.js to manage candidate data, integrating with a PostgreSQL database for persistent storage.

User Management System (2026)

github.com/kavithz/User-Management-System

- Built a full-stack web application enabling secure user registration, login, and user management using React, Node.js, Express, and PostgreSQL.
- Integrated JWT authentication and bcrypt password hashing to secure user records and provide protected access.
- Engineered search, management, and update functionalities for efficient user record handling.

SmartHarvest - Smart Agriculture Management System (2025-2026)

github.com/kavithz/SDGP_SmartHarvest

- Developed a smart farming mobile application to improve agricultural productivity using Flutter, Dart, and Firebase.
- Engineered backend REST APIs in Python and Flask integrated with machine learning libraries (scikit-learn, pandas, NumPy) for crop price forecasting.
- Implemented secure user authentication, real-time database management, and weather data integration via OpenWeatherMap API.
- Led the project team, coordinating task delegation and system integration to deliver an efficient platform for farmers and buyers.

SDG 4 - Quality Education Web Platform (2024)

github.com/kavithz/Web-Development

- Built a structured web platform using HTML and CSS, focusing on content organization and accessibility.
- Designed and implemented responsive UI layouts using modern CSS techniques to enhance user experience and cross-device compatibility.
- Applied advanced styling, layout structuring, and semantic HTML practices to deliver a visually consistent and maintainable front-end solution.

Tic-Tac-Toe (2024)

github.com/kavithz/Tic_Tac_Toe

- Developed a Python-based 2-Player console game with interactive board controls and turn-based gameplay.
- Implemented automated win and draw detection to validate game outcomes.
- Developed input-handling and game-state logic to manage player moves and gameplay conditions.

EDUCATION

BEng (Hons) Software Engineering

Informatics Institute Technology Colombo 2023 - PRESENT • Colombo • 2028

English Language & Communication

British Council Colombo • Colombo • 2023

- Developed advanced spoken English proficiency, improving fluency, pronunciation, and professional communication.
- Enhanced academic and business writing skills through structured essay, email, and report composition exercises.

• Mastered academic and business English methodologies to facilitate clear communication in workplace and educational contexts.

Nalanda College

Colombo • 2023

- Completed 9 subjects including core areas such as English, Mathematics and Science
- Built a strong foundation in problem-solving and academic skills.

CERTIFICATIONS

Road to Legacy 2.0 – Technology & Innovation Workshop

University of Sri Jayewardenepura | IEEE • 2023

INVOLVEMENTS

Leader

Colombo • SDGP OF IIT • September 2025 - April 2026

Member

Colombo • MEDIA UNIT OF NALANDA COLLEGE • January 2018 - May 2023

Member

Colombo • AIRCRAFT ENGINEERING SOCIETY OF NALANDA COLLEGE • January 2018 - May 2023

SKILLS

Languages: Python, Java, JavaScript

Frontend: React, Flutter, Dart, HTML, CSS, UI & UX

Backend: Node.js, Express.js, Flask, REST APIs

Database: PostgreSQL, SQLite, Firebase, MySQL

Version Control: GitHub, Git

Concepts: OOP, MVC, Data Structures

Tools: Microsoft Office, ClickUp, Jira

Security: JWT, bcrypt
